## **DETAILED ACTION**

### ***Oath/Declaration***

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the citizenship of each inventor.

### ***Claim Objections***

2. Claim 10, line 3, shouldn't "in" be deleted? Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Li et al US

Patent No. 5,864,560 .

Art Unit: 2631

Li et al discloses a method and apparatus having the step of transmitting information used to configure a transmitter in the data mode without entry back to into the startup mode whereby in-band signaling is used to reconfigure a modem transmitter without having to switch to the startup mode see col. 11, lines 10-13, lines 23-25, lines 48-54 and lines 60-64, col. 12, lines 45-49, thus eliminating inherently swichtover time and taking advantage of higher data rate associated with the data mode.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al in view of applicant' s background of the invention page 4, lines 15-19.

As applied to claim 10 above, Li et al discloses every feature of the claimed invention but does not explicitly teach the further limitation recited in claim 11. However, such limitation is old and well known in the art as acknowledge by applicant see page 4, lines 15-19. It would have been obvious to one skilled in the art to incorporate such a teaching in Li et al so as to take advantage of higher data rate provided in the data mode.
